

Let users **play a short game for a reward.**

Add one opt-in rewarded flow to Luzia that trades a short sponsored game for something users already value. We reviewed 5 ideas: 1 ship, 0 need revision, 4 rejected.

1 FLOW 1 · SLIDE 3

Play for 1 Fast-Track Animation Credit

Users can play a quick Simula game with Luzia to earn Fast-Track Credits that bypass the animation processing queue during peak hours.

SHIP

Score 4.70 / 5 (ship ≥ 3.8)

Product change

\$0.009–\$0.015 per view

Earned per completed US view; the reward costs ≈ \$0 to serve.

Paid path untouched

Standard generation remains fully free and functional.

≤ 5 a day

Opt-in only, at least 10 min apart; nothing plays unless the user taps.

ONE COMPLETED VIEW EARNS

\$0.009–\$0.015

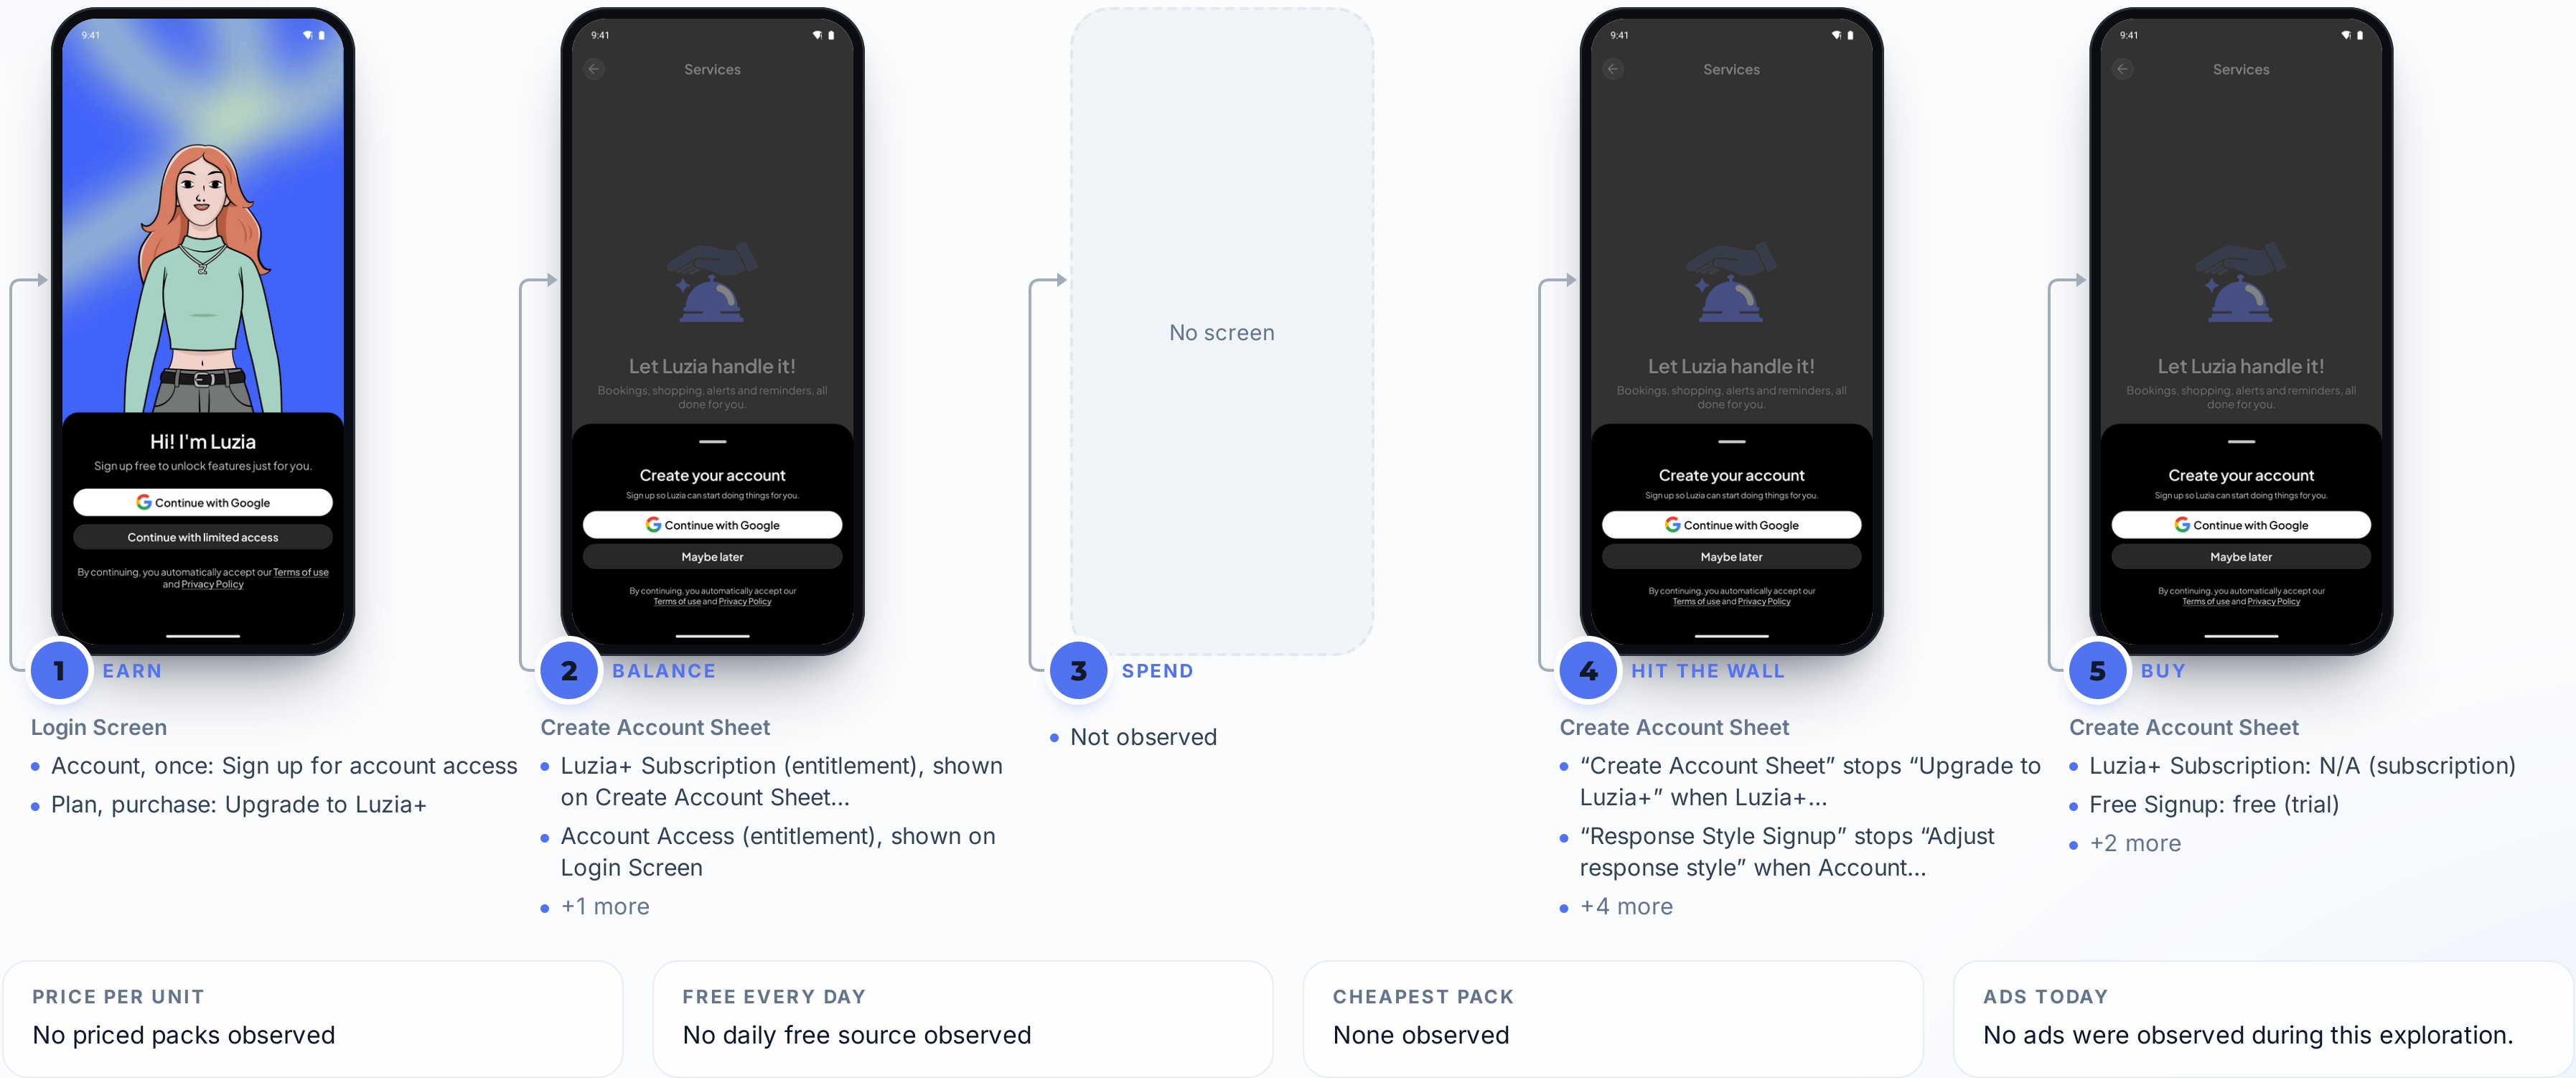

US rewarded eCPM after a non-game haircut, about \$0.0063 net at the low end. The app shows no prices, so there is no exchange rate in its own units; every reward on these slides costs less than that to serve. In LATAM a view earns \$0.0015–\$0.003.

CHEAPEST PACK

No priced pack was observed, so there is no paid path to cannibalize in currency terms.

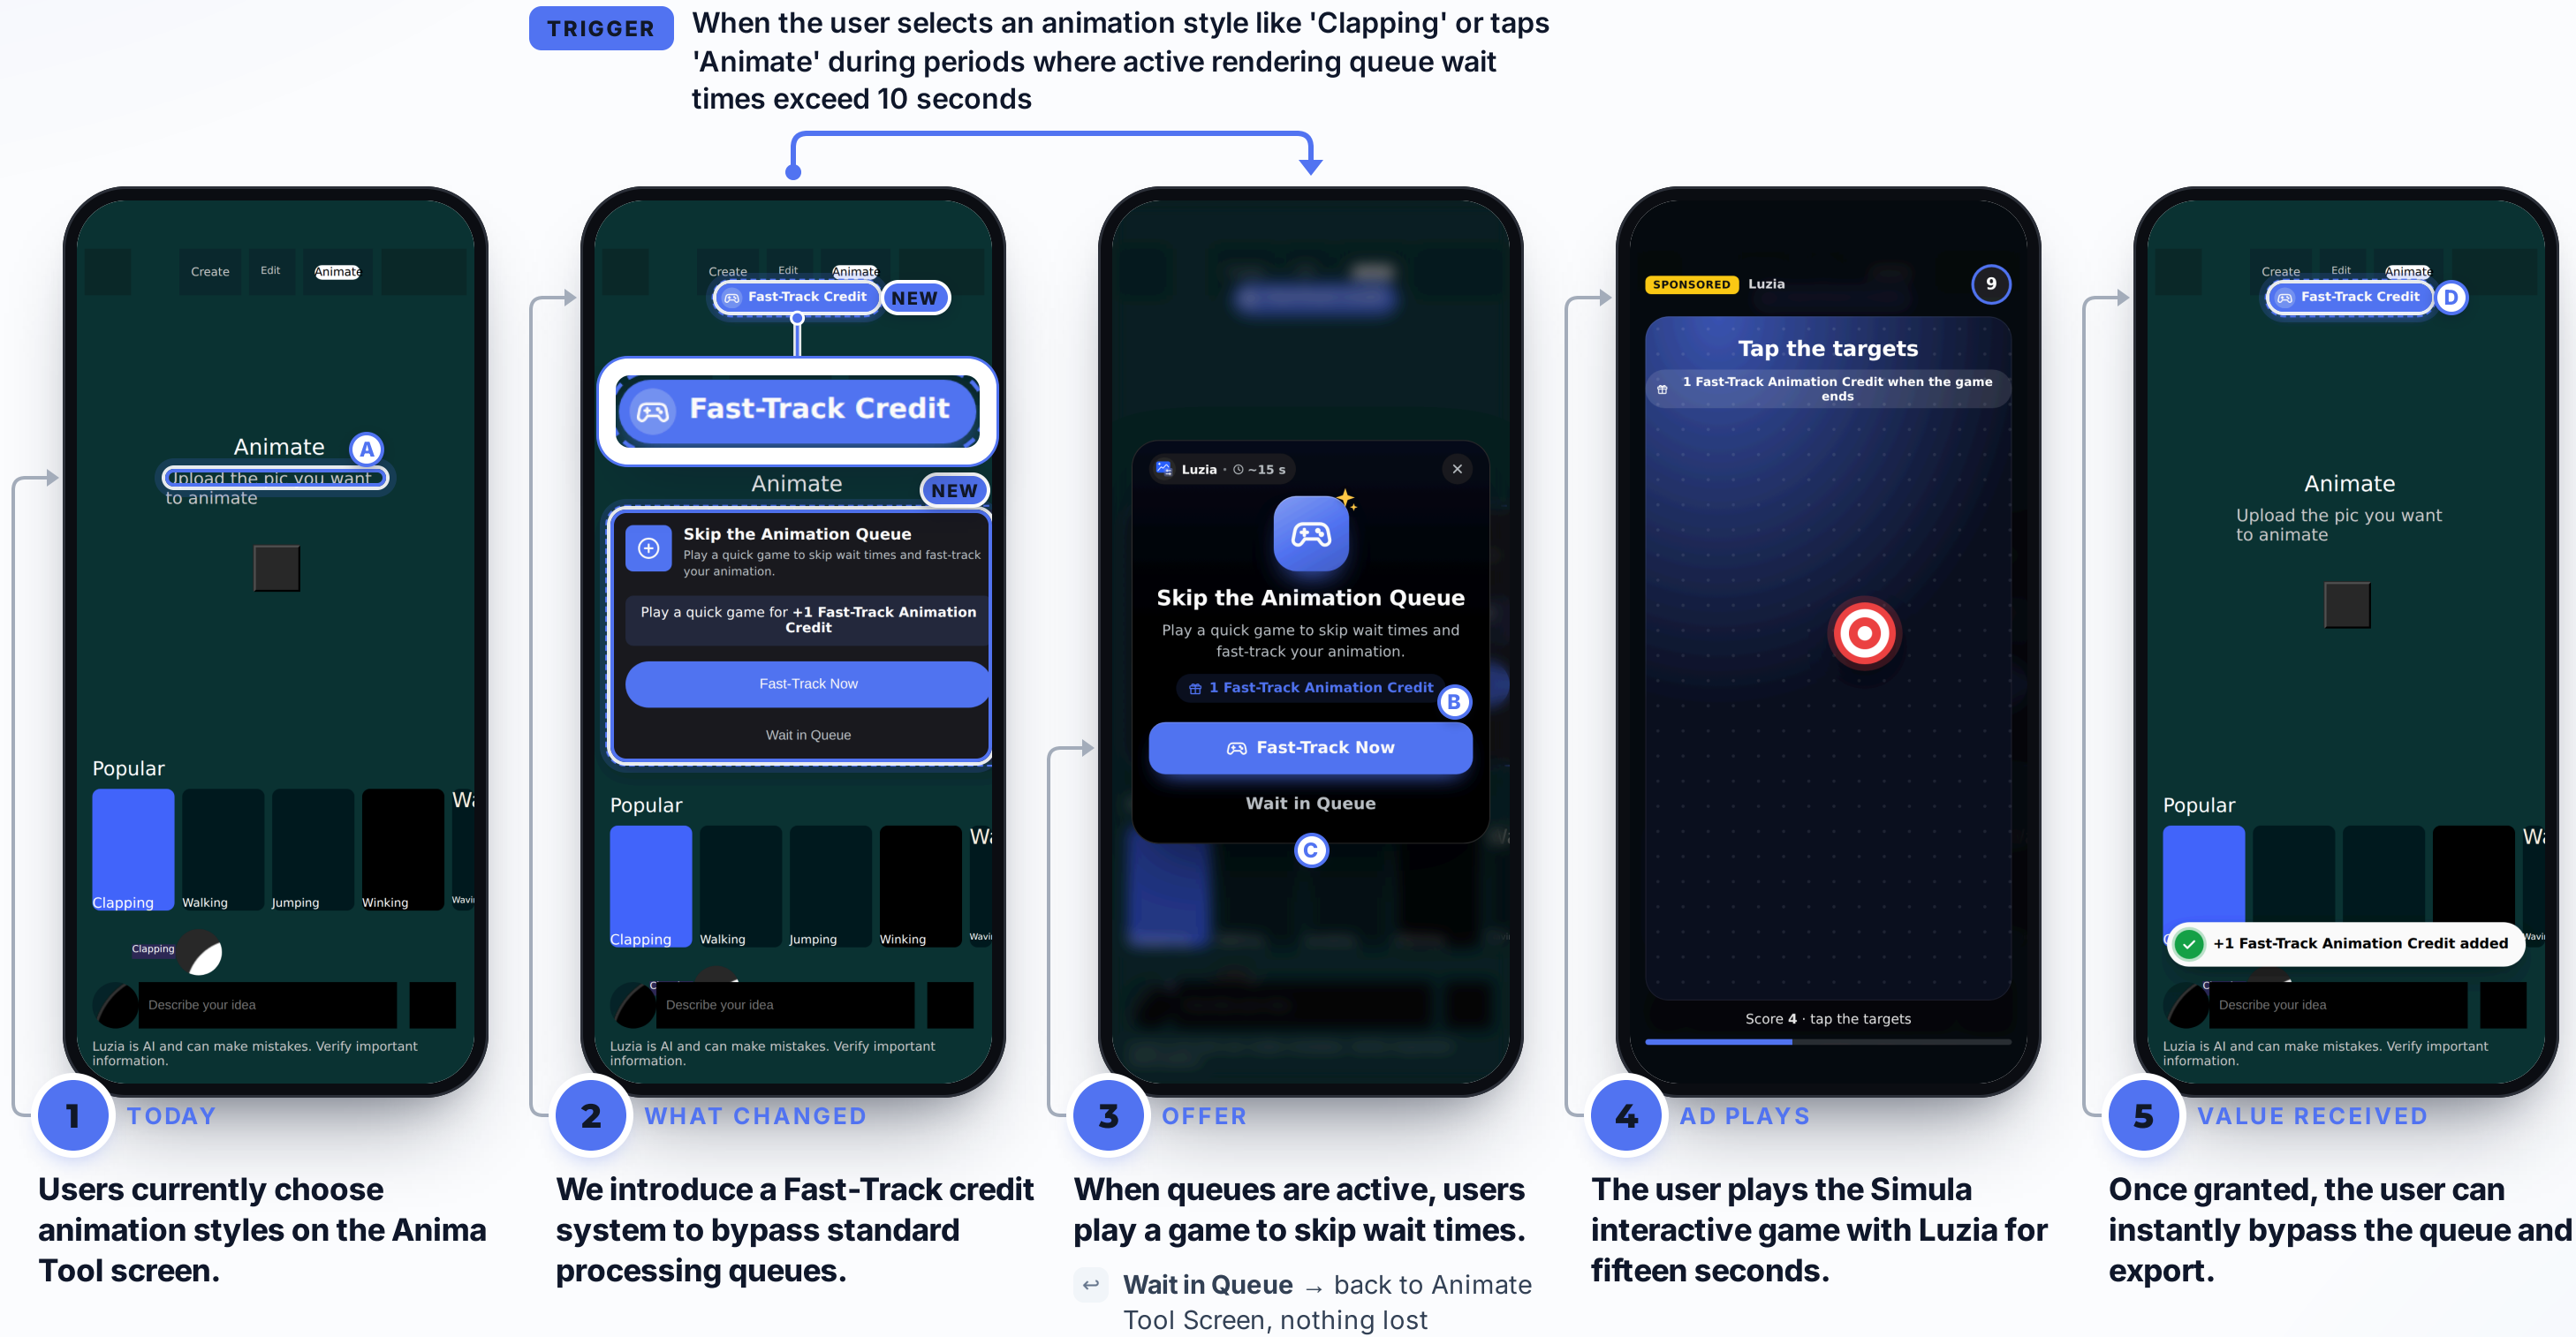

How Luzia makes money today

The app monetizes through a premium subscription model ('Luzia+') that unlocks advanced features, and through a free signup that provides access to core customization... Real screens from the app; prices and costs as observed.

Anima Queue Fast-Track Priority

TRIGGER

When the user selects an animation style like 'Clapping' or taps 'Animate' during periods where active rendering queue wait times exceed 10 seconds.

ELIGIBILITY

Non-paying free tier users who want to skip the standard rendering queue during peak hours.

WHAT THE USER SEES

Skip the Animation Queue Play a quick game to skip wait times and fast-track your animation.

Fast-Track Now

Wait in Queue

REWARD AND CAPS

1 Fast-Track Animation Credit; granted on REWARD_VERIFIED. At most 5 a day, 10 min apart.

FRAME BY FRAME (SLIDE 3)

- 1

Today Users currently choose animation styles on the Anima Tool screen.
- A

Users upload their picture and pick an animation style.
- 2

What changed We introduce a Fast-Track credit system to bypass standard processing queues.
- NEW

Displays the user's current Fast-Track credits.
- NEW

Allows triggering a fast-track queue skip.
- 3

Offer When queues are active, users play a game to skip wait times.
- B

Fast-Track Now: starts a 15s sponsored game
- C

Wait in Queue: dismisses the offer
- Tapping this opens the Simula game invitation to earn 1 Fast-Track Credit.
- 4

Ad plays The user plays the Simula interactive game with Luzia for fifteen seconds.
- 5

Value received Once granted, the user can instantly bypass the queue and export.
- D

Credit balance is updated to 1.
- Fast-Track button is now unlocked to instantly render.

ECONOMICS (COMPUTED IN CODE)

Revenue per completed US view	\$0.009–\$0.015
Reward value at list price	n/a (no priced unit)
Reward ÷ one view	n/a
Max earnable per day (5/day)	n/a
Cheapest pack	none observed
Cost to serve the reward	\$0 per view

SCENARIO, NOT FORECAST

0.12

\$0.0014

\$525,600

views per DAU

ARPDau

per year per 1M DAU

Scenario, not a forecast: 8% of DAU engage, 1.5 views each, US mid eCPM after a 25% non-game haircut.

CANNIBALIZATION GUARD

Standard generation remains fully free and functional. Wait times only surface during authentic backend rendering congestion to prevent artificial friction, and Luzia+ subscribers always bypass...

KPI AND HOLDOUT

Anima Fast-Track Ad Revenue; guardrails: Luzia+ Subscription Conversion Rate, s09 Screen Churn Rate, D7 Retention. User-level randomized holdout group, 10% allocation, evaluated over 28 days.

RISKS

- If peak rendering queue wait times are negligible, the user's perceived value of Fast-Track...

INTEGRATION (@SIMULA/ADS-REACT-NATIVE)

```
import { SimulaAds, useRewardedAd, MiniGameButton } from "@simula/ads-react-native";
import { useEffect, useState } from "react";

// P5 on "Animate Tool Screen". Trigger: When the user selects an animation style
// like 'Clapping' (e24) or taps 'Animate' (e13)...
// Caps 5/day, 10 min apart: app remote config (unit cap: dashboard)
const AD_UNIT = "SIM-RWD-animate-tool-screen"; // placeholder: create it in the
// dashboard

export function AnimaQueueFastOffer({ userId, partnerImageUrl, grant, onDecline }) {
  const rwd = useRewardedAd(AD_UNIT);
  const [capped, setCapped] = useState(true);
  useEffect(() => {
    SimulaAds.checkFrequencyCap(AD_UNIT, userId).then(setCapped); // true: hide
    rwd.setMetadata({ surface: "animate-tool-screen", proposal: "P5" });
    rwd.load({ charName: "Luzia" }); // Game Partner
  }, [userId]);
  useEffect(() => {
    // Grant on REWARD_VERIFIED (server-verified), never on EARNED_REWARD.
    if (rwd.rewardVerified) grant({ amount: 1, resource: "r_fast_track_credit",
    token: rwd.rewardToken });
  }, [rwd.rewardVerified]);
  // no_fill or not loaded: render nothing; today's path is unchanged.
  if (capped || !rwd.isLoaded || rwd.error?.code === "no_fill") return null;
  // "Wait in Queue" stays the app's own control: back to where the user was.
  return (
    <MiniGameButton
      text={"Fast-Track Now"}
      onClick={() => rwd.show()}
    />
  );
}

// Min play 15s is a unit setting (no RN load option; unverified).
// Needs <SimulaProvider apiKey={...}> at the root; grant() is your server call.
```

WHAT THE JUDGE CHANGED

- Round 0 (v1) REVISE 3.25: Cost to serve per view (\$0.0250) severely exceeds net ad revenue (\$0.0063), creating an unsustainable, loss-making... Required: Fix unit...
- Round 1 (v2) REVISE 3.55: Reach is very limited because Anima is an auxiliary tool within the Apps catalog rather than Luzia's core chat loop... Required: Recalibrate...

PRECEDENTS (KNOWLEDGE BASE)

- TAX-4** Progression acceleration (skip wait, speed up, skip queue)
- EX-UTIL** Utilities
- TRIG-5** Offer UX anatomy (what a good offer card contains)
- POL-8** Simula ad units (the client's vocabulary; from public docs and SDK)

Ideas we rejected, and why

Every candidate the judge scored, with its final verdict. Only SHIP becomes a flow; REVISE is never promoted. Weighted score out of 5.

ID	IDEA	VERDICT	SCORE	WHY
P5	Anima Queue Fast-Track Priority Product change	SHIP	4.70	SHIP at 4.7 (v3 after 2 revisions). See slide 3.
P4	Daily Check-In Image Generation Hub Product change	REJECT	4.40	REJECT after 2 revisions: fixable gate failed: economics (code); unit-economics scored 2 (< 3); still REVISE after round 2. Top concern: economics (code): Cost to serve...
P3	Single Deep Reasoning Query Unlock Existing mechanic	REJECT	4.00	REJECT after 1 revision: revision stalled (weighted -0.05, below +0.2) with the same gate failures. Top concern: grounding (code): economy item "Deep reasoning query...
P1	Paywall Decline Guest Services Pass Existing mechanic	REJECT	3.65	REJECT after 2 revisions: fixable gate failed: reward-coherence (code); value-moment-fit scored 2 (< 3); feasibility scored 2 (< 3); weighted 3.65 < 3.8; still REVISE...
P2	Custom Bestie Slot Unlock on Signup Decline Existing mechanic	REJECT	2.85	REJECT: weighted 2.85 < 3. Top concern: reward-coherence (code): the reward grants 1 "account" of Account Access, an entitlement: grant a time box or a number of uses...

Obvious baseline the proposer had to go beyond: Watch an ad on s07 Create Account Sheet paywall to get temporary Luzia+ access. · Watch an ad on s23 Login Screen to bypass free signup and access Account Access features. · Watch an ad on s10 Image Creation Hub to generate an AI image without limits.

Method and mock fidelity

1. **Explore.** 175 steps, 38 states, 171 edges, 1 external surface in 26 min; stopped: budget steps. 107 actions deliberately not explored.
2. **Understand.** 38 screens in the product model; 15 claims verified against on-screen text, 0 inferred. Synthesized by llm.
3. **Mock + QA.** 33% of screens rebuilt in HTML; 134/135 navigation flows pass.
4. **Propose.** 10 ideas, 5 developed into typed proposals (patch, storyboard, assumptions). Generated by llm.
5. **Judge.** 12 judgment rounds for 5 proposals: code gates first, then a rubric scored by llm; the verdict is computed in code (ship ≥ 3.8 , every criterion ≥ 3 , ≤ 2 rounds).
6. **Slides.** Every frame is a screenshot of the patched mock driven through its runtime API; callouts sit on measured DOM positions; numbers come from economics code.

Cost and limitations

MODEL SPEND FOR THIS APP (FROM COST.JSONL)

STAGE	LIVE CALLS	CACHED	TOKENS IN	TOKENS OUT	USD
explore	108	23	306.2k	62.8k	\$0
understand	3	0	58.1k	21.9k	\$0
mock	11	0	70.6k	97.7k	\$0
qa	11	0	71.8k	135.1k	\$0
judge	71	64	5.0M	248.0k	\$0
propose	42	34	2.7M	197.2k	\$0
slides	8	18	52.8k	45.3k	\$0
Total	254	139	8.2M	808.0k	\$0

Gemini free tier: calls cost \$0; tokens are still logged. Models: gemini-3.5-flash-lite, gemini-3.8-flash, gemini-2.5-flash, gemini-3.5-flash, gemini-3-flash-preview, gemini-3.1-flash-lite, gemini-3.6-flash, gemini-3.7-flash. Cached calls replay from disk at no cost.

LIMITATIONS

- Explored on an Android emulator (guest account); 107 actions left unexplored by guard rails or scope, listed in the model viewer.
- 0 product-model claims inferred rather than observed; the economy review is the human checkpoint for them.
- Revenue per view uses KB eCPM ranges with a non-game haircut; some constants are inferred. ARPDau appears only as a labelled scenario.
- The ad in the frames is simulated by the mock; real fill, creatives and completion rates vary by market.
- The judge is a separate call of the same model family as the proposer; its single-fault calibration table is in judge-eval.md.

How this runs across hundreds of apps

Storage and versioning

- Screenshots, element lists and HTML are content-addressed blobs; artifact JSON references them by hash.
- A model version is keyed by package, version code and a UI fingerprint of the core flows, which also catches over-the-air updates.
- A diff between two model versions (screens, walls, prices, offers) is itself a sales signal.

When to re-explore

- Daily store version poll; weekly no-LLM smoke replay of the core flows and the path to the wall.
- Drift above 10% or any price change triggers an incremental re-explore from the known graph (about 20% of first-run cost).
- A new ad format re-runs only propose and judge.

Where humans review

- App onboarding and login (15 min); economy review, the highest-leverage step (10 min).
- Deck approval before any customer sees it (15–30 min); exception queue for blocked apps.
- Monthly judge audit against labelled outcomes.

Cost and sales fit

- Prospect scan without a mock ≈ \$5 of model calls; full pitch pack ≈ \$20–25 plus 45–60 min of human review.
- The deck, clickable prototype and sizing sheet attach to the CRM deal; each SHIP's integration snippet becomes the implementation ticket.
- Post-launch opt-in, completion and IAP guardrails flow back to recalibrate economics and the judge.
